- Communication skills
- Public relations
- Team work
- Time Management
- Project Management
- Leadership

TECHNICAL SKILLS

- Python
- Java
- SQL
- Front End Development

EXPERIENCE

Internship- Edunet Foundation, 2025
Project: Garbage Classification
Description: The Garbage Classification Project aims to automatically segregate waste into categories such as biodegradable, recyclable, and non-recyclable using technology. By applying machine learning or deep learning models trained on images of different types of garbage, the system ensures accurate and efficient waste sorting.This reduces the dependency on manual labor and minimizes errors in segregation.
